Contents

1 Møller, J. J., Danielsen, T. K. & Fjalstad, A.: Late Weichselian glacial maximum on Andøya, North Norway

15 Björck, S., Ingólfsson, Ó., Hafliðason, H., Hallsdóttir, M. & Anderson, N. J.: Lake Torfadalsvatn: a high resolution record of the North Atlantic ash zone I and the last glacial-interglacial environmental changes in Iceland

23 Norðdahl, H. & Hafliðason, H.: The Skógar Tephra, a Younger Dryas marker in North Iceland

43 Rodbell, D. T.: Late Pleistocene equilibrium-line reconstructions in the northern Peruvian Andes

53 Charman, D. J.: Blanket mire formation at the Cross Lochs, Sutherland, northern Scotland

73 Hicock, S. R.: Lobal interactions and rheologic superposition in subglacial till near Bradtville, Ontario, Canada

89 Brunnberg, L. & Possnert, G.: Radiocarbon dating of the Goti-Finiglacial boundary of the Swedish Time Scale

105 Rousseau, D-D.: Terrestrial molluscs as indicators of global aeolian dust fluxes during glacial stages

111 Bennike, O. & Böcher, J.: Early Weichselian interstadial land biotas at Thule, Northwest Greenland

119 Hart, J. K.: Sedimentary environments associated with Glacial Lake Trimingham, Norfolk, UK

137 Lemmen, D. S. & England, J.: Multiple glaciations and sea level changes, northern Ellesmere Island, high arctic Canada

153 Meer, J. J. M. van der & Wicander, R.: A Silurian–Devonian acritarch flora from Saalian till in The Netherlands

159 Nielsen, N.: A boulder beach formed by waves from a calving glacier; Eqip Sermia, West Greenland

169 Marienfeld, P.: Recent sedimentary processes in Scoresby Sund, East Greenland

193 Lowe, J. J.: Lateglacial and early Holocene lake sediments from the northern Apennines, Italy – pollen stratigraphy and radiocarbon dating

209 Ingólfsson, O., Hjort, C., Björck, S. & Smith, R. I. L.: Late Pleistocene and Holocene glacial history of James Ross Island, Antarctic Peninsula

223 Bergsten, H. & Nordberg, K.: Late Weichselian marine stratigraphy of the southern Kattegat, Scandinavia: evidence for drainage of the Baltic Ice Lake between 12,700 and 10,300 years BP

253 Salonen, V.-P., Eriksson, B. & Grönlund, T.: Pleistocene stratigraphy in the Lappajärvi meteorite crater in Ostrobothnia, Finland

271 Lycke, A. K., Mangerud, J. & Sejrup, H. P.: Late Quaternary foraminiferal stratigraphy from western Svalbard

289 Gaigalas, A. I., Serebryanny, L. R. & Valueva, M. N.: Middle Valdaian forest environments at Biržai, northern Lithuania

295 Hebbeln, D.: Weichselian glacial history of the Svalbard area: correlating the marine and terrestrial records

305 García Ambrosiani, K. & Robertsson, A.-M.: Early Weichselian interstadial sediments at Härnösand, Sweden

319 Magny, M.: Holocene lake-level fluctuations in Jura and the northern subalpine ranges, France: regional pattern and climatic implications

335 Landvik, J. Y., Bolstad, M., Lycke, A. K., Mangerud, J. & Sejrup, H. P.: Weichselian stratigraphy and palaeoenvironments at Bellsund, western Svalbard

359 Anderson, R. S., Jacobson, G. L. Jr., Davis, R. B. & Stuckenrath, R.: Gould Pond, Maine: late-glacial transitions from marine to upland environments

373 Regnéll, J.: Preparing pollen concentrates for AMS dating – a methodological study from a hard-water lake in southern Sweden

379 Karrow, P. F.: Carbonates, granulometry, and color of tills on the south-central Canadian Shield and their implications for stratigraphy and radiocarbon dating

Book Reviews

14 Björck, S.: A wealth of paleoclimatological information – in addition, free of charge!

42 Humlum, O.: Environmental change in Iceland: past and present

103 Houmark-Nielsen, M.: A comprehensive inventory on glacigenetic sediments and facies

187 Ingólfsson, O.: A stimulating (but uneven) textbook on Ice Age Earth

190 Björck, S. & Svensson, N.-O.: Challenging problems in land–sea interactions

318 Mörner, N.-A.: World atlas of Holocene sea-level changes

391 Larsson, L.: Late Stone Age hunters

Boreas Pioneers

97 Andersen, B. G.: Jens Esmark – a pioneer in glacial geology
